Interprofessional Clinical Informatics Transformation Program
The Key to Quality, Safety, Teamwork, and Outcomes

Thursday, October 9, 2014

Registration includes - Conference materials, continental breakfast, lunch, and networking reception hosted by the New Jersey Chapter of the Healthcare Information Management System Society (NJHIMSS)

Intended Audience - Healthcare informatics staff members, nurses, physicians, pharmacists, staff members in quality, risk management and/or safety roles; and students in healthcare professions.

Purpose - To provide a forum for educating leaders to collaborate across disciplines, using the pillars of quality, safety, teamwork, and informatics to analyze, strategize, manage and enhance the use of data/information to support the healthcare needs of today and tomorrow.

Program Objectives - At the completion of this conference, participants will be able to:

1. Describe the process and components of speaking the new language of healthcare outcomes.
2. Define roles and responsibilities in ensuring quality and safety using data-driven methodologies for optimal outcomes.
3. Cite the role of informatics in the future of healthcare as well as the risks, roadblocks and opportunities.
4. Describe how interprofessional learning can positively impact outcomes using informatics, data, teamwork, and simulation.
5. Define the role of informatics based medication safety and the strategies to improve processes and outcomes.
6. Cite examples of best practices implemented to improve clinical care.
7. Define performance systems and raw data sources from an EHR that support transformation into Meaningful Use.
8. Identify the process for designing reports and specifications.
9. Describe a Health Information Exchange (HIE) and its implication for the future of healthcare.
10. Identify what will be next for healthcare and the role of informatics in that change process.
11. Identify common healthcare informatics pitfalls and resolutions.
